Professional Summary

I'm a Systems Engineer and Android Developer with over 10 years' building scalable native applications using Kotlin and Jetpack Compose. Strong background in Clean Architecture, product-driven development, and technical leadership. Experienced in leading end-to-end mobile solutions across LATAM and Europe, combining technical excellence with business impact. Recently focused on integrating AI-driven capabilities into mobile solutions through IBM's AI programs. Passionate about building high-impact products, optimizing user experience, and driving innovation in fast-paced environments.

Relevant Experience

Android Developer

Bemobile | Barcelona, Spain | Remote

October 2021 – Present

- Led end-to-end Android development using Kotlin and Jetpack Compose for high-impact clients.
- Owned key features from ideation to production, aligning technical decisions with product goals.
- Defined scalable architectures and drove refactoring initiatives based on Clean Architecture.
- Conducted feasibility studies and technical discovery for new initiatives.
- Collaborated with Product Owners to translate business needs into user-centric solutions.
- Coordinated cross-functional teams (backend, iOS, design) ensuring high-quality delivery.
- Mentored developers and promoted strong engineering standards and ownership culture.

Android Developer

Freelancer, LATAM & Europa | Remote

2015 – 2021

- Delivered Android applications for international clients across LATAM and Europe.
- Owned full product lifecycle: idea validation, architecture, development, and delivery.
- Designed scalable mobile solutions using Firebase, APIs, geolocation, and authentication systems.
- Provided technical consulting and feasibility analysis to guide product decisions.

Android & Xamarin Dev

Hiberus Tecnologías, Zaragoza, ES | Híbrido

2019 – 2021

- Developed hybrid and native mobile applications with focus on scalability and code reuse.
- Contributed to architectural decisions improving maintainability and development efficiency.
- Collaborated with cross-functional teams to deliver consistent mobile solutions across platforms.

Android Car Developer

InclulT, Cordoba, AR | Presencial

2018 – 2019

- Developed and maintained Android-based in-vehicle systems for Honda dashboards.
- Worked on performance-critical features under strict quality and reliability requirements.
- Collaborated in agile teams handling complex technical constraints and real-time systems.

Last Certifications

Artificial Intelligence Fundamentals

IBM SkillsBuild | 2025

Machine Learning Fundamentals with Python

IBM SkillsBuild | 2025

Generative AI & Prompt Engineering with ChatGPT

IBM SkillsBuild | 2025

ChatGPT for Productivity in Microsoft Office

IBM SkillsBuild | 2025

Technical & Soft Skills

Programming Languages:

Kotlin, Java, Jetpack Compose

Mobile Development:

Jetpack Compose, Android SDK, Firebase, REST APIs, Offline - first architectures

Architecture & Patterns:

Clean Architecture, MVVM, MVI, Modularization

Asynchronous & Data Handling:

Kotlin Coroutines, Flow, LiveData, SQLite, DataStore

Tools & Platforms:

Git, GitHub, CI/CD (Bitrise, Jenkins), Jira, Confluence

Languages:

Spanish (Native), English (B2)

Engineering Practices:

Performance optimization, scalable design, code quality, technical decision-making

Soft Skills:

- Strong communication with clients, stakeholders, and cross-functional teams.
- Technical decision-making aligned with business impact.
- Problem-solving in complex technical and functional scenarios.
- Mentoring and onboarding developers (junior to mid-level).
- Ownership mindset, autonomy, and proactive execution.
- Strategic thinking with a product-oriented approach

Publications

AI-Pill: How AI “Sees” Images (2025) | 2025

Explains how computer vision systems process images through convolutional layers and pattern recognition, translating pixels into meaningful data.

WeChat Login Integration for Android | 2025

Technical article on implementing WeChat OAuth in Android, improving user conversion and optimizing UX for the Chinese market.

Mobile App Accessibility: More Than a Trend | 2025

Explores accessibility best practices, assistive technologies, and common development pitfalls to build inclusive mobile applications.

Selected Technical & Product Impact

WeChat Login Integration – UX Optimization for Chinese Market

- Identified onboarding friction due to lack of local authentication methods.
- Implemented WeChat OAuth integration using official SDK in Kotlin.
- Increased conversion by 35%, reduced login time by 50%, and achieved 80% adoption.

Technical Portfolio – emilsyzanella.github.io/resume

- Developed Android applications for clients across LATAM and Europe.
- Projects include Jetpack Compose, Firebase, payments, geolocation, and scalable architectures.
- Full product lifecycle involvement: analysis, design, development, testing, and deployment.
- Focus on clean architecture, modularization, and performance.
